Amirhossein Izadi

Tehran, Iran

RE: Offer of Contract – AI Software Engineer (Overseas Independent Contractor)

Dear Amirhossein Izadi,

On behalf of Intelligent Hub, we are pleased to offer you an independent contractor agreement for the position of AI Software Engineer. We are excited about the skills and expertise you will bring to our team and look forward to a successful collaboration.

This offer is contingent upon your acceptance of the terms and conditions outlined in this letter and the attached Independent Contractor Agreement.

1. CONTRACT DETAILS

Position Title: AI Software Engineer (Independent Contractor)

Contract Type: Fixed-Term Independent Contractor Agreement (Overseas)

Contract Duration: March 18, 2026 until termination

Reporting To: Ali Abedi, Chief Artificial Intelligence Officer, ali@intelligenthub.ai

Work Location: Remote (Overseas – Iran)

2. RESPONSIBILITIES

LLM and Machine Learning Solution Development

- Design, develop, fine tune, optimize, and deploy Large Language Model (LLM) based systems and related machine learning models for company use cases.
- Build end to end ML pipelines, including data ingestion, preprocessing, fine-tuning, evaluation, inference, monitoring, and iterative improvement.
- Implement techniques such as prompt engineering, retrieval augmented generation, tool calling, structured outputs, and agentic workflows when required.
- Select and justify appropriate model families, architectures, and approaches based on performance, cost, latency, privacy, and maintainability needs.
- Maintain reproducibility of experiments through versioning of code, data, configurations, and model artifacts.

System and Architecture Design

- Design scalable, maintainable, and secure software and ML architectures, including service boundaries, components, and integrations.

- Produce technical designs and documentation for architecture decisions, trade offs, and implementation plans.
- Define and implement performance, reliability, observability, and security requirements for ML systems.

Training, Evaluation, and Experimentation

- Train, fine tune, and evaluate models using appropriate methodologies, including offline metrics and real-world validation.
- Define evaluation protocols, benchmarks, acceptance criteria, and regression testing to ensure model quality over time.
- Conduct error analysis and model debugging, and implement mitigation strategies (for example bias reduction, hallucination reduction, safety filters, or calibration) as needed.
- Optimize model performance for latency, throughput, memory, and cost, including batching, quantization, distillation, caching, or other efficiency techniques when appropriate.

Tooling and ML Engineering Practices

- Use appropriate tools and frameworks to support development and deployment, including (as applicable) ML frameworks, LLM orchestration libraries, experiment tracking, CI/CD, containerization, and cloud services.
- Build internal utilities, scripts, and automation to improve team productivity, reliability, and repeatability of ML workflows.
- Ensure code quality through clean design, testing, code review participation, documentation, and adherence to company engineering standards.

Database Design and Data Management

- Design, implement, and maintain databases and data storage solutions based on product and system requirements.
- Work with structured and unstructured data, including embeddings and vector search solutions when required.
- Design schemas, indexing strategies, access patterns, and data retention policies to support product performance and scalability.
- Ensure data integrity, availability, and appropriate access controls, including handling of sensitive or regulated data where applicable.

API and Service Development

- Design and implement APIs and backend services to expose ML and LLM capabilities to internal and external consumers.
- Build inference services and integrate models into production systems, including request validation, rate limiting, logging, tracing, and error handling.
- Support integration with third party systems and tools through REST APIs, webhooks, SDKs, or other interfaces as required.

Deployment, Operations, and Monitoring

- Deploy ML services to production and maintain operational stability, including monitoring, alerting, and incident response support for ML related components.
- Implement model monitoring for drift, degradation, data quality issues, and system performance, and take corrective actions as needed.
- Maintain and update deployed models and systems, including upgrades, migrations, bug fixes, and security patches.

Documentation, Communication, and Reporting

- Create and maintain clear documentation for architectures, pipelines, APIs, configuration, deployment steps, and operational runbooks.
- Communicate progress, risks, and blockers in a timely manner and provide regular status updates aligned with company expectations.
- Participate in scheduled meetings, technical discussions, and project planning sessions as required.
- Provide regular progress updates and report to the assigned manager or supervisor.
- Communicate promptly about technical issues, risks, or delays that may affect timelines or deliverables.
- Collaborate with team members to ensure alignment with project goals.
- Maintain professional communication through the company's designated channels (Email, Slack, and Jira).

Security, Privacy, and Compliance Support

- Follow secure engineering practices and company policies related to access control, credentials, secrets management, and data protection.
- Implement safeguards appropriate to LLM systems, including input validation, output filtering, and protections against prompt injection and data leakage, as required by the application.
- Support compliance requirements where applicable (for example data retention, auditability, or regulatory constraints) in coordination with the company.

3. PROJECT MILESTONES

Project milestones will be defined and communicated at the start of each individual project. Specific deliverables, timelines, and milestone criteria will be outlined in a project brief provided by Intelligent Hub prior to the commencement of each project. Milestones are expected to span between two weeks and one month in duration.

4. COMPENSATION & PAYMENT TERMS

4.1 Payment Structure

The Contractor will be compensated on a milestone basis for each project. Each project will be defined by the Company and will include a set of specific milestones and associated payments. The payment amount and milestone breakdown will be provided at the commencement of each project. The Contractor may submit an invoice upon completion of each milestone, and payment will be processed within 15 business days following approval of the milestone deliverable by the Company.

4.2 Payment Method & Timeline

Payments will be made via our partner in Iran to the account details provided by the Contractor. All payments will be processed within 15 business days of milestone approval and invoice submission.

4.3 Currency & Taxes

All payments are denominated in Iranian Rials (IRR). The Contractor is responsible for all applicable taxes, duties, and government charges related to their compensation in their country of residence. Intelligent Hub will not withhold taxes or make deductions unless required by applicable law.

5. PERFORMANCE EXPECTATIONS & WORKING ARRANGEMENTS

5.1 Work Hours & Availability

As an independent contractor, you have flexibility in managing your work schedule. However, you are expected to:

- Be available for scheduled meetings and collaboration with the team during Eastern Time (ET) business hours (Toronto, Ontario, Canada)
- Respond to communications within 24 hours during business days
- Attend weekly status meetings
- Deliver milestones according to agreed-upon project timelines

5.2 Quality Standards

All deliverables must meet professional industry standards, including clean code, comprehensive testing, proper documentation, version control best practices, and security compliance.

5.3 Communication & Reporting

The Contractor will provide regular progress updates through Slack/Teams/Email and participate in weekly status meetings. The Contractor is expected to proactively communicate any challenges, delays, or blockers.

5.4 Tools & Equipment

The Contractor is responsible for providing their own computer, software, and internet connection. Intelligent Hub will provide access to the necessary development tools, platforms, and licenses required for the project.

6. INTELLECTUAL PROPERTY & CONFIDENTIALITY

All work product, code, documentation, and deliverables created during this contract are the exclusive property of Intelligent Hub. The Contractor agrees to maintain strict confidentiality of all proprietary information, trade secrets, and business information. A separate Non-Disclosure Agreement (NDA) and Intellectual Property Assignment Agreement will be provided for execution.

7. INDEPENDENT CONTRACTOR STATUS

The Contractor is engaged as an independent contractor and not as an employee of Intelligent Hub. The Contractor is solely responsible for their own tax obligations, insurance, and benefits. This contract does not establish an employment relationship, partnership, or joint venture between the parties.

8. TERMINATION

Either party may terminate this contract with 30 days' written notice. In the event of termination, the Contractor will be compensated for completed and approved milestones only. Intelligent Hub reserves the right to terminate this agreement immediately for cause, including but not limited to breach of contract, failure to meet quality standards, or failure to meet agreed deadlines.

9. GOVERNING LAW

This contract shall be governed by the laws of the Province of Ontario, Canada. Any disputes arising under this agreement will be resolved through arbitration or in the courts of Ontario, Canada.

We are excited to have you join the Intelligent Hub team and look forward to a successful collaboration. Please review this offer carefully. If you accept, please sign and return this letter along with the attached Independent Contractor Agreement by [Deadline Date].

Should you have any questions or require clarification, please do not hesitate to contact us at hr@intelligenthub.com.

Sincerely,

Ali Abedi

Chief Artificial Intelligence Officer

Intelligent Hub

ACCEPTANCE OF OFFER

I, Amirhossein Izadi, accept the terms and conditions outlined in this offer letter and agree to commence work as an Independent Contractor for Intelligent Hub under the terms specified above.
